Questions Surround Irregularities in California's 2020 Election

Nonpartisan watchdog seeks answers on over 2 million documented registration and voting anomalies.

Santa Clarita, Calif. – California's November 3, 2020 election was marred by significant voting and registration irregularities, according to Election Integrity Project® California, Inc. (EIPCa). The non-partisan organization analyzed the state's official voter list of February 9, 2021 and [reported](#) its findings to California's Secretary of State Shirley Weber on June 17, 2021. This followed EIPCa reports of 2020 cross-state voting on April 30 and May 18, 2021 that the Secretary has ignored. EIPCa's June report cites California's election code that requires officials to provide timely answers to citizens' questions.

EIPCa seeks answers to the following questions, on behalf of California voters:

- 1. Why are there almost 124,000 more votes counted in California's November 3, 2020 election than voters recorded as voting in that election?** And why is most of the discrepancy driven by 116,000 vote-by-mail ballots with no apparent voter identified in VoteCal's voting histories? Click [here](#) for a list by county.
- 2. Why do more than 7,700 voters have TWO November 3, 2020 votes credited to their voting histories?** These are two votes credited to each of 7,700 unique (non-duplicated) registration ID numbers in the state database. This indicates mass double voting, a significant programming error in the state's registration system, or both.
- 3. Why does California have 1.8 million more registered voters than eligible citizens and why did this overage rise 72% in the 2020 election cycle?** Click [here](#) for a list by county.

VoteCal Database Date	# Counties with Registrations Exceeding # Eligible Citizens	Total Ineligible Registrations
March 2020	11	1,063,957
February 2021	23	1,834,789 (+72% since 3/20)

- 4. Why did California's on-line and DMV registration systems change 33,000 foreign-born voters' birthplaces of record to "California" or "United States", potentially masking non-citizens unlawfully registered to vote?** Similarly, why were 76,000 birthplaces changed from another U.S. state to California? Click [here](#) for a chart of birthplace changes.

"Many in the nation are questioning the validity of the 2020 general election in their states", said **EIPCa President Linda Paine**. "Mass irregularities in California's registration and voting numbers continue to erode voter confidence here and we are hopeful Secretary Weber will immediately address our questions."
